REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art fails to teach a substrate that contains fibers, i.e., nonwoven web material, on which is coated zwitterionic dye, e.g., Reichardt's dye, in an amount effective to undergo a detectable color change upon exposure to the bacteria.

The closest prior art recites a solid substrate that contains Reichardt's dye (see Office Action mailed 02 October 2008). The prior art previously cited included a test strip containing a dye (see Berger et al. US 3,496,066), and Inouye (JP 1108349) also teaches a test strip containing merocyanine, a particular species of solvatochromic dye. No prior art teaches a substrate containing fibers, i.e., nonwoven web material comprising cellulosic fibers, on which is coated an amount of zwitterionic dye, e.g., Reichardt's dye, effective to undergo a detectable color change upon exposure to bacteria.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
